

TUBE & BAR HOT FORMING SELECTION GUIDE

CONDAT, your lubricant partner for all metal applications

CONDAT develops, manufactures, and markets a global offer for Hot and Cold forming of Tubes, including rolling, drawing, and corrosion protection for all metals.

Taking advantage of its expertise in metal die casting, wire drawing and metal working, CONDAT has developed innovative speciality lubricants under the brand name CONDATUB, COLLUBE, VICAFIL and CONDAPROTECT.

An extensive product range covering all applications

The CONDATUB range provides solutions for hot deformation.

Our technical lubricants allow a reduction of friction, prolonging the lifetime of tools and improving the surface quality of the tubes.

Working on a daily basis to respect the strictest legislation in terms of human and environmental protection, this range includes alternatives more efficient than Borax and other dangerous products.

		Steel	Stainless Steel	Aluminum & Alloys	Copper & alloys	Titanium alloys	
HOT FORMING	Graphite free & aqueous based	CONDATUB C 221				•	Hot Forming. Ceramic dispersion.
		CONDATUB 139			•		Lubricant for die and mandrel. Dispersion of organic salts & polymers. Sprayable.
		CONDATUB 61 BLUE	•		•	•	Blue lubricant. Emulsion of complex organic salts and high performance polymers. Easy to spray.
		CONDATUB 45			•	•	Mandrel extraction and hot forming - Easy to spray.
	Graphite - Water Dispersions	CONDATUB B 34-20	•		•	•	For die and mandrel lubrication. Ready to use.
		CONDATUB B 383 - B 385	•	•			Mandrel extraction and hot forming. Sprayable lubricant.
		CONDATUB B 31	•				Hydro-forming lubricant - Sprayable.
		CONDATUB B 659				•	Sprayable graphited lubricant for billet extrusion.

The list of lubricants below is not exhaustive but only an extract of our range. Please contact us for further information.
